

Live-En-Synergy — V1 Scope of Work & Engagement Terms

Prepared for: Sakshi Gulati

Prepared by: Ketan Khamgaonkar — NeosigmaticAI (AI & Software Engineering Services)

Date: 14 July 2026

Note: This document updates and supersedes the earlier *"Live-En-Synergy · V1 Scope of Work"* (July 2026) to reflect the flat-rate terms discussed over email — payment integration and one round of testing are now included; extended/dedicated QA is not.

1. Project Brief

Live-En-Synergy is a sponsorship marketplace connecting brands, artists/event organisers, and audiences for live events. Brands fund sponsorship campaigns; artists and organisers list events and receive confirmed attendance; audience members sign up for sponsored events and receive a reward (e.g., ticket reimbursement) after verified attendance.

V1 is a deliberately minimal MVP built to validate this three-sided flow with a small number of real events.

2. Scope of Work — V1 MVP

2.1 User roles

Four user types with separate dashboards and data isolation:

- **Brand (sponsor)** — creates and funds sponsorship campaigns.
- **Artist / Event organiser** — lists events and accepts sponsorship offers.
- **Audience member** — signs up for sponsored events and claims rewards.
- **Admin (you)** — approves profiles, matches brands to events, verifies attendance, releases rewards.

2.2 Brand portal

- Signup and login
- Brand profile — name, logo, banner, description, product category, mission and vision statement, target audience keywords, keywords that define the brand, genre of

artists/events typically partnered with, preferred sponsorship location, website and social media links, sponsorship manager name/email/phone, company address

- Create a sponsorship campaign — campaign description (up to 50 words), sponsorship budget (GBP), category of artist/event (with 'other' text field), preferred event location (city, country), preferred event timeline (month/year), name of specific event or artist if pre-selected, reward rule (up to 200 words — e.g., first N signups, random N draw, specific postcode/institution), campaign manager name and email, any additional notes
- Automatic email confirmation on campaign submission
- View campaigns and campaign ticket status (in-progress, closed, completed)
- Browse available events open for sponsorship (filter by artist name, location, category)
- View confirmed sponsorships and attendance reports

2.3 Artist / event organiser portal

- Signup and login
- Choose profile type at signup — Artist or Event Organiser (separate form paths, separate field sets)
- Artist profile — stage name, bio (up to 500 words), profile picture and banner, category (Music, Comedy, Sportsperson, Visual Artists, Digital/Multimedia Artists, Other), website, social media links (Facebook, YouTube, Instagram, TikTok, Spotify, LinkedIn, X, Pinterest, plus custom links), date of birth, location, contact-person name/email/phone, address, keywords describing your art, mission and vision statement
- Event Organiser profile — event name, description, profile image and banner, category (Music, Comedy, Sports, Conference & Academic, Exhibition/Expo, Theatre, Gaming & E-sports, Fashion, Other), website and social media links, existing partners/sponsors (or n/a), contact-person name/email/phone, company address, keywords, mission and vision statement
- Sponsor-value statement — describe how you can fulfil sponsor branding duties (social media posts, collaborations, mentions, tags, on-event logo placement, roll-up banners, merchandise table, etc.) up to 500 words
- Create an upcoming event open for sponsorship — event name, date, venue name/city/country, category, capacity, ticket price (GBP inc. taxes), ticket buying link, sponsorship budget range, details of existing sponsors, benefit to sponsors (branding placement, on-site options), autolinked artist profile, contact-artist option
- System auto-generates a unique event reference number
- View incoming sponsorship offers, review terms, and confirm (sponsorship terms plus agreed checkbox by both parties)
- View confirmed sponsorships and audience signups

2.4 Audience portal

- Signup and login — name, email, phone, date of birth, address (with account verification)
- Browse upcoming sponsored events with reward rules displayed

- Sign up for an event and reserve a sponsored slot if available — capture raw participant data (name, age, location, gender, postcode; questions customisable per event)
- Selected-participant additional details — full address, gender, bank account details (collected for record; disbursement is manual — see §2.7), newsletter and promotions consent checkbox
- Upload ticket proof (Step 1 verification — see §2.12)
- Physical attendance confirmed by artist or admin at the venue (Step 2 verification — see §2.12)
- View reward status (pending, approved, paid)
- My participated events — history of events participated in and rewards received

2.5 Admin portal (you)

- Access to all dashboards (brand, artist/event, audience) with global events list and status view
- Approve brand and artist/event profiles
- Review and process sponsor requests — approve, reject, or forward to matched artist/event
- Match brand campaigns to artist events (semi-manual — see §2.9)
- Configure reward rules per campaign
- Mark attendance for audience members — supports two-step verification (audience ticket upload plus artist or admin confirmation — see §2.12)
- Generate a QR code per artist/event for use at the venue (fallback when box-office data is unavailable — see §2.12)
- Eligibility check and participant selection process per event
- Trigger reward approvals and manage payout list (CSV export — see §2.7)
- Customer queries / support-ticketing system — track and respond to inbound queries from brands, artists, and audience members
- Audience data management — track repeat engagement across events
- View platform activity: signups, active campaigns, completed sponsorships (headline metrics; full analytics in §2.11)

2.6 Public website (multi-page)

- Homepage — three-sided value proposition explainer, featured upcoming sponsored events, signup CTAs for brands, artists, and audiences
- About Us page
- Events page — browsable listing of upcoming sponsored events with filters (category, location, date)
- Contact Us page — enquiry form plus contact details
- FAQ page (top-level FAQs; per-event FAQs handled in §2.13)
- Terms & Conditions page
- Privacy Policy page
- Sakshi supplies copy for About Us, Contact Us, FAQ, Terms, and Privacy; I structure and style the pages

2.7 Payment integration

- Brand-side payment collection through the platform (one gateway, one currency)
- Payment status reflected against each campaign (paid / pending)
- Platform commission calculated and displayed to the brand at campaign creation — £315+VAT minimum or 9%+VAT of the sponsorship budget, whichever is higher. The remaining budget available for sponsorship is shown after commission. Actual commission collection is manual (invoiced separately by Sakshi, or deducted from the sponsorship budget before payout)
- Reward amounts owed to audience members are tracked in the system and exported as a payout list (CSV) for Sakshi to disburse manually

2.8 Testing — *first round*

- One structured end-to-end test pass across all four user flows (brand → artist → admin → audience) before handover
- Bug fixes for issues found during this round
- Production deployment under Sakshi's accounts
- Handover documentation (admin guide, common operations)

Excluded: dedicated or extended QA phases — multi-round regression testing, load/stress testing, or a separate QA cycle. These would be scoped and quoted separately if needed.

2.9 Matching engine

- Simple semi-manual matching — admin reviews brand campaigns and artist events in the admin portal (§2.5) and creates matches by hand. One reward rule per campaign. No automated matching engine or demographic targeting in V1.

2.10 Communication

- In-app chat
- In-app notifications
- WhatsApp/SMS notifications

2.11 Event analytics dashboard

- Event metrics: participation rate, verified attendance, rewards redemption rate, cost-per-verified-attendance, total event attendance
- Conversion funnel: sponsor campaign viewed → registration → ticket purchased → attendance verified → reward claimed
- Audience insights: age range, gender, location, interests, category of events attended
- Sponsorship intelligence: brand ↔ artist/event compatibility scores and match report

2.12 Attendance verification

- QR code generation per artist/event for use at the venue
- Two-step verification — Step 1: audience uploads ticket proof; Step 2: artist or admin confirms physical attendance at the venue
- Admin fallback: attendance can be marked manually where artist confirmation is unavailable

2.13 Sponsor branding, FAQs & feedback

- Sponsor-branded email and communication templates — brand supplies branding once, platform reuses across event comms (fill-template style)
 - Per-event configurable FAQs — admin or artist creates a FAQ set per event, shown on the event's audience-facing page
 - Feedback forms and testimonials collected from audience post-event
-

3. Out of scope

- Native iOS and Android apps — V1 is a responsive web build only
- Extended or dedicated QA phases (see §2.8) — multi-round regression, load/stress testing, or a separate QA cycle would be scoped and quoted separately

4. Investment & payment terms

4.1 Flat project fee

USD \$1,400, all-inclusive of the scope in Section 2 (build, payment integration, and the first round of testing).

4.2 Payment schedule

Milestone	%	Amount (USD)	INR
Kickoff — contract signed, repo + hosting accounts provisioned, project scaffolded and deployed to staging	30%	\$420	₹40,300

Milestone	%	Amount (USD)	INR
Brand + Artist portals working end-to-end — signup, profiles, campaign creation, event listing, admin matching (demoable on staging)	30%	\$420	₹40,300
Delivery — Audience portal + payment integration + attendance/reward loop passing \$2.8 end-to-end test across all four flows on staging	30%	\$420	₹40,300
Handover — production deployment under Sakshi's accounts, handover docs delivered, 14-day bug-fix window opens	10%	\$140	₹13,500
Total	100%	\$1,400	₹1,34,400

4.3 What's included

- All build work described in Section 2, including payment integration
- One round of end-to-end testing and associated bug fixes
- Milestone demos and review sessions
- Source code in a GitHub repository owned by Sakshi
- Production deployment under Sakshi's accounts
- Handover documentation
- 14 days of post-launch bug-fix support

4.4 What's not included

- Domain registration and hosting/gateway fees (paid directly by Sakshi to Vercel, Supabase, Stripe, etc.)
- Legal review of Terms, Privacy, and payment-provider contracts

- Logo and brand design (Sakshi provides assets)
- Marketing copy for the landing page (Sakshi provides text; I structure the pages)
- Brand and artist acquisition
- Extended/dedicated QA (Section 2.8)

4.5 Remittance details

Milestone payments (Section 4.2) should be remitted to the following account:

- Beneficiary: M/S. NEOSIGMATICAL TECHNOLOGY OPC PVT LTD
- Bank: HDFC Bank
- Branch: Nagpur — Pratap Nagar (45 Vidya Kunj, Kotwal Nagar, Veer Savarkar Marg, Nagpur 440022, Maharashtra, India)
- Account number: 50200119396432
- Account type: Current
- IFSC (NEFT / RTGS / IMPS): HDFC0001786
- Currency: INR

For international wire transfers, the SWIFT/BIC code and correspondent-bank details will be provided on the first invoice.

5. Timeline

Estimated at **4–6 weeks** from kickoff, structured as build-in-progress with a mid-project demo and a final delivery/handover milestone.

6. What I'll need from Sakshi

- **Before kickoff:** domain name, logo, brand colours, one-paragraph mission statement, and confirmation of which payment gateway/region to integrate (e.g., Stripe UK)
- **Before mid-project demo:** one real or representative brand profile and one real or representative artist profile with a sample event
- **Before delivery:** landing page copy (I'll provide a brief)
- **Weekly:** a short review/feedback session

Delayed inputs will push the timeline by the same amount.

7. Terms of Agreement

7.1 Intellectual property

All source code, the GitHub repository, and the deployed platform transfer to Sakshi's ownership upon receipt of the final milestone payment. All third-party accounts (hosting, database, domain, payment gateway) are created and owned directly by Sakshi from the start — I configure them, but the accounts and billing sit with her.

7.2 Confidentiality

Both parties agree to keep the other's business information, data, and this agreement's commercial terms confidential, both during the engagement and after it ends.

7.3 Change requests / scope changes

Any feature or change outside Section 2 is treated as new scope: it will be estimated and confirmed in writing (email) before work starts, and may affect the timeline and fee. This protects the flat rate — it only holds for the scope defined above.

7.4 Revisions & bug-fix support

The one round of testing in Section 2.8 covers fixes for issues found during that round. After handover, 14 days of bug-fix support is included for defects in delivered functionality (not new features). Issues raised after that window, or requests for additional QA cycles, are billed separately at an hourly or per-fix rate to be agreed at the time.

7.5 Payment terms

Invoices are issued at each milestone in Section 4.2. Payment is due within 5 days of invoice. If a milestone payment is more than 7 days overdue, work pauses until it's settled.

7.6 Cancellation

Either party may end the engagement with written notice. Sakshi pays for all work completed up to the point of termination; payments already made for completed milestones are non-refundable.

7.7 Warranty & liability

The platform is delivered as tested in Section 2.8. There's no liability for outages or issues caused by third-party services (Vercel, Supabase, the payment gateway, etc.), or for indirect/consequential losses arising from use of the platform.

7.8 Communication

Primary communication by email (ketankham@gmail.com), with a short review call at each milestone.

7.9 Acceptance

This document becomes the binding agreement for the V1 MVP engagement once Sakshi confirms it in writing (email reply is sufficient) and the kickoff payment (Section 4.2) is received. Earliest kickoff: within 7 days of confirmation and payment.
